A LEADER IN INTRA-ASIA

With an organization dedicated to reefers and a network of experts in 15 countries, CNC is your best Intra-Asia reefer partner with local expertise in refrigerated transport. CNC is committed to providing our customers with the highest quality service, ensuring your cargo arrive at destinations efficiently and in peak condition.

MODERN EQUIPMENT & ADVANCED TECHNOLOGIES

Refrigerated containers can be used to carry a variety of goods that require specific atmosphere, temperature or humidity levels, such as fruits, vegetables, beverages, frozen foods and pharmaceuticals. These sensitive cargoes deserve the best possible controlled environment during transport to maintain their quality all the way to their final destinations. As part of the CMA CGM Group, CNC has access to a large and advanced reefer container fleet, offering various technologies to meet the shipping requirements of our customers.

PROTECTING THE ENVIRONMENT

As one of the leading global shipping group, CMA CGM Group is committed to deliver the most eco-friendly shipping solutions possible. The Group continuously invest in innovation and new equipment that will help reduce energy consumption and CO2 emissions. When you ship with CNC, you can be assured that you are shipping responsibly.
