

At CNC, we apply decades of experience to develop optimum reefer solutions for every type of frozen cargo, including frozen cargo which are best shipped at temperature of -35°C or lower. Refrigeration units such as Magnum and Magnum Plus can generate low temperatures down to -35°C and -40°C in order to maintain optimum shelf life.

Features

- Lowest Temperature
- Fast Pull-Down
- Precise Temperature Control
- Low Energy Consumption
- Proven Technology

Commodities

- Frozen fish with high fat content such as tuna, mackerel, herring, sardines and salmon
- Crustaceans such as lobsters
- Raw materials for manufacturing of pharmaceutical products
- Ice-cream
